

SDC profile

SDC Trailers LTD, Toomebridge, Co. Antrim

SDC Trailers LTD, Mansfield, England

MDF Engineering, Antrim

Established in 1978, in Toomebridge, Northern Ireland, SDC began by manufacturing trailers and commercial vehicle bodies. Through the acquisition of Neville Charrold in 1994, a specialist tipping trailer manufacturer in Mansfield, Nottinghamshire, SDC expanded both its range of trailers as well as its production facilities onto the UK mainland.

In 1998, SDC became part of Retland Ltd, owners of MDF Engineering of Antrim, Northern Ireland, who themselves were a major supplier to SDC. This has enabled SDC to manufacture not only the trailers, but all the components in-house.

From these three modern and efficient manufacturing facilities, with over 300,000 square feet of production space, the entire design and manufacturing process is under our direct control.

The company is amongst the most modern trailer manufacturing facilities in Europe and fully accredited to ISO 9001/2000.

To fulfil the needs of customers, SDC uses computer aided design utilising the latest technology, which means trailers can be built to individual customers' specifications. The trailers have a number of innovative features, including bolting the body to the chassis rather than welding it. This allows for easy accident repair, meaning the trailer is off the road for the minimum amount of time, saving time and money.

Every trailer comes with a five-year chassis warranty and five-year chassis paintwork warranty provided by 

After sales care is a high priority with SDC. A network of service agents throughout the UK & Europe can help you keep your trailer maintained and on the road.

A 24hr emergency call out service has also been established in the UK and Europe. Parts Assist provide same day or next day delivery of genuine manufacturers' replacement parts.

Our aim is to ensure your trailer investment delivers a rapid return and contributes to the profitability of your business for many years into the future.

The company reserves the right to change or update trailer specifications without prior notice. Full warranty details available separately.

“SDC Flatbeds are built on chassis technology developed from a close understanding of freight operators needs.”

true choice & quality

SDC build many variations of their flatbed trailer to suit the customers operation, including PSK's, extendables and crane trailers (rollalong or fixed mounted).

Although generally the more basic of the SDC model range there is no lack of attention to the customers needs or requirements, from toolboxes to load restraint options. The SDC flatbed provides the workhorse trailer required by it's operators.

SDC's production plants at Toomebridge and Antrim in Northern Ireland and Mansfield, England, are the most modern of their kind in Europe and accredited to ISO 9001/2000 standard. With the **entire design and manufacturing process under our direct control**; from the basic steel selection and process right through to fabrication and assembly of all chassis and body components, the exacting standards we set in terms of build quality can be rigorously and consistently maintained.

From a paint finish point of view, our trailer units set the standard in terms of appearance and long-term durability. Using the Nexa autocolour Turbo Plus system, **a technologically advanced 2 pack product over a fully shot blasted and pre-drilled chassis frame**, our trailers will look good longer and enhance residual values.

All of our trailers are built to comply with EEC and UK construction and use regulations.

true flexibility

One of the key advantages to investing in an SDC trailer is the **level of customisation** we can provide in the build. In addition to an impressive and comprehensive range of options, our 'state of the art' engineering departments can work with you to tailor a flatbed design to perfectly match your application throughout Europe.
